

Welcome to AP Chemistry!

Throughout the summer I'll be posting chemistry assignments on Google Classroom. Each week you will be assigned a problem set, which has a total of 10 problems, to complete.

These problem sets will be posted every Sunday and they are due on the following Sunday at 11pm. The focus will be on stoichiometry and the problems are designed for you to continue to practice what you learned this year in your chemistry class. The first problem set will be posted on June 30th and it's due on July 7th.

The Google Classroom code is **1r89dh** (AP Chem Summer 2019)

Have a safe summer!

Dr. Dias
